

COMPARING LEGAL CANNABIS GROWTH RATES TO OTHER INDUSTRIES

The legal cannabis industry is growing explosively. In 2015 adult use (recreational) sales grew 232%, making it one of the very fastest growing sectors of the economy. The total combined medical and adult use markets are growing at a lower rate of 31%. This growth rate put the overall legal cannabis industry on par with some of the economy's hottest sectors, including Big Data.

With strong consumer demand, rapid expansion into new states, and growing public support for national legalization, the legal cannabis industry is poised to be a leading growth market for the years to come.
